

2.6.2 Attainment of programme outcomes and course outcomes are evaluated by the institution.**Response:**

Each course has a defined set of course outcomes and corresponding evaluation criteria. The course outcomes are mapped to the program outcomes which are used to provide the quantitative measurement of how well the program outcomes are achieved. The performance of the students in the examinations during the semester in each course is used to compute the level of attainment of the Program outcome and Program Specific Outcomes through the mapping of questions to Course Outcomes and Course Outcomes to Program outcomes and Program Specific Outcomes. Course Outcome-Program outcome & Program Specific mapping for all the courses in the program is prepared by the program coordinator in consultation with other faculty members.

Evaluation of Course outcomes and Program outcome:

The each and every course running in the Institution has specific outcomes. The assessment of course outcome and program outcome is basically based on regular internal assessment, assignment work and end semester examination conducted by the university. The assessment is done through theory and practical parts.

Course Outcome and Program Outcome Attainment:

Assessment methods include direct and indirect methods. The process of course outcome assessment by direct method is based on mid examinations, semester end examination and quiz. Each question in mid/semester end/assignment/quiz is tagged to the corresponding course outcome and the overall attainment of that course outcome is based on average mark set as target for final attainment.

1. **Internal Assessment** are conducted according to the scheme of the course and each of them covers the evaluation of all the relevant course outcomes.
2. **Semester End Examination** is descriptive, and a metric for assessing whether all the course outcomes are attained.

At the beginning of the session the Institute pre define some targets to attain. To attain these targets the college has a central placement cell in which various companies visit regularly and give the students chance for the placement. The company offers a handsome package to the selected students. At the end of the session the overall results from the assessments of the program outcome are compared with the expected attainment. The program outcome is considered satisfied on attainment of the expected level.

For each course, the level of attainment of each course outcome is compared with the predefined targets, and if not attained, the course coordinator takes necessary steps for improvement. If the target criterion level is not reached, then faculty suggest for improvement to attain the same.
